

INDUSTRY-LEADING TECHNOLOGY TO CONTROL COSTS KEEPS YOU IN CONTROL

DOES YOUR TECHNOLOGY SOLUTION PROVIDE REAL-TIME INVENTORY TO SUPPORT DEMAND PLANNING?

Labor shortages and staff training are familiar challenges in healthcare, but have certainly been made worse in recent years. Additionally, as mergers and acquisitions of health systems continue to occur, there is a need to become more organized and centralized, and there is opportunity to leverage economies of scale. Technology and innovation focused on labor, quality and efficiencies are the keys to success.

The programs that US Foods® offers help build resilient foodservice supply chains to support growing centralized departments. They help operators save on time and cost, and boost retail performance without compromising patient and resident satisfaction.

REAL-TIME SUPPLY CHAIN MANAGEMENT ALLOWS YOU TO:

PROACTIVELY MANAGE CUSTOMER-
APPROVED PRODUCT SUBSTITUTIONS

INSTANTLY MAKE CHANGES
TO ORDER GUIDES ACROSS YOUR
ENTIRE ORGANIZATION

DEMAND REPORTING IN REAL TIME

“Partnering with the US Foods Business Solutions team has helped gain alignment with product opportunities that promote cost savings. Master List Management has helped [our community] establish a centralized order guide to optimize contract savings through product prioritization. As the VP of Dining Services, and needing to create a dining program from scratch, partnering with US Foods just made sense.”
