FOOD SAFETY
PROTECTING YOUR BRAND
Protect your brand.

You spend countless hours developing menus and dining experiences that inspire customer loyalty. Your brand and your business depend on unfailingly safe food delivery.

Foodborne illness – even one instance of it – can be a disaster. It hurts your guests, damages your reputation and devastates your finances.

Protect yourself and your brand. Always use safe food-handling processes and tools. Rely on the products and information in this catalog to keep your operation safe, your guests shielded and your business strong and healthy.

Provide the safest food possible.

As a US Foods® customer, you benefit from our expert Food Safety & Quality Assurance (FSQA) organization and its field-to-fork solutions. The tools, tips and key FSQA insights throughout this catalog will strengthen your operation’s food safety practices.

Ensure safety throughout the food cycle.

Food safety starts when you receive products and ends with proper serving and cleanup. The products on the following pages are essential for creating a safe food environment in every part of your operation.

LEARN WHAT THESE PRODUCT CODE COLORS MEAN FOR ORDERING

2775708  GREEN product codes identify US Foods Exclusive Brand items that are stocked at a nearby US Foods location or US Foods Culinary Equipment & Supplies® distribution center. Prices include standard delivery within the continental U.S. when ordered through your US Foods sales representative, or online at www.USFoods.com/order.

1214410  BLACK product codes identify items that are stocked at a nearby US Foods location or US Foods Culinary Equipment & Supplies distribution center. Prices include standard delivery within the continental U.S. when ordered through your US Foods sales representative, or online at www.USFoods.com/order.

1214410  BLUE product codes identify items that are shipped directly from the manufacturer. Prices of these items do not include delivery, unless otherwise noted. Please allow at least 10 business days for delivery, and in some cases, additional lead time is required.

2775708  ORANGE product codes identify items that are shipped directly from the manufacturer and can be ordered through your US Foods sales representative, or online at www.USFoods.com/order. Please allow at least 10 business days for delivery.

THERMOCOUPLE WITH FOLDING PROBE
by Lifetime Brands
Digital Thermocouple Thermometer with folding probe. Splash-resistant with 1.50mm diameter stepdown probe. -40° to 572°F range. Field recalibratable with hold and F & C selectable features. NSF listed. Batteries included.
3612736

INFRARED THERMOMETER WITH LASER
by Lifetime Brands
Safe non-contact temperature measurement eliminates cross-contamination. Range: -4° to 605°F/-20° to 320°C. LCD display with bright easy-to-read backlight display. Registers surface temperature in half a second. Resolution: 0.2°F or 0.2°C; accuracy +/- 2°F; +/- 1°C. Distance spot 8:1. 9 volt battery included.
1595636

KLEVER KUTTER™ BOX CUTTER
by San Jamar®
Features a recessed blade that also prevents damage to the contents of cartons by allowing only a minimal portion of the blade to penetrate the carton surface. Durable ergonomic design, and is dishwasher safe. Red. 3/Pk. NSF.
0699587

DID YOU KNOW?
Time-temperature abuse is a factor in foodborne illnesses
Poor food quality can be a sign that the food has been time-temperature abused and, therefore, may be unsafe

SAFETY TIPS
• Always schedule deliveries for when you have time to properly receive them
• Maintaining a clean dock and checking all shipments are critical before food enters your facility
• The packaging of food and non-food items should be intact and clean. It must protect food and food-contact surfaces from contamination
ONE-LINE LABEL GUN by Daydots™
Easiest-loading food rotation labeler available. Automatically aligns with just a few clicks after loading. High-quality ink and ink rollers. Easy-to-change ink roller. ABS plastic for extreme durability. Virtually-jam proof. Ergonomical. Easy-to-use dials provide a simple method to indicate month, day, date and time on a compact plain or colored label.

3647211 Label Gun
3657681 Rep’l Labels, 1,000/Roll, 8 Rolls/Case

RECEIVING SCALE by Lifetime Brands
Engineered for accuracy. Dual powered - 120V with AC adapter or use 6 AA batteries (not included). Easy-to-read 1” LCD remote display with mounting bracket. 12½” x 12” stainless platform removes for cleaning. Non-skid feet for stability. 150 lb. x 0.20 lb. Advanced features: lb./kg. conversion, auto tare, auto hold, low battery indicator and auto shut off. 115V.

9348871

HEAVY-DUTY ADAPTABLE UTILITY CART by Rubbermaid®
Variable handle adjusts to four positions for comfortable handling and easier transport of awkward loads.

1590114 Utility Cart

HEAVY-DUTY SERVICE CARTS by Carlisle®
Excellent for transporting heavy loads. Edges reduce potential for items to fall off. Polypropylene construction. Gray. 500 lb. capacity.

3988623 25”W x 45”L x 33”H
3877743 17½”W x 40”L x 331/2”H

SERVICE CART by Cambro®
Twin-handle cart has a 300 lb. capacity. Three 24½” x 15½” shelves with ledges keep contents on the cart. Four swivel casters. Grey. 16½”W x 32½”L x 38”H.

3402005
Keep food safe and preserve quality by following good storage guidelines. Proper labeling, temperature control, placement and rotation will keep food fresh and safe.
FOOD ROTATION LABELS
Dissolve completely away in your dishwasher or sink and can be used on any food storage container. 3"W x 2"H with "Item" and "Use By" lines.

FOOD SAFETY
Camwear® Food Pans

by Cambro

These polycarbonate pans are your perfect choice for all storage and serving needs between -40°F and 210°F. Camwear® pans offer these advantages over stainless steel hotel pans; they stack neatly, no jamming or sticking; the non-stick surface increases yields; they are virtually unbreakable, no bending or denting; they won’t produce banging metal sounds. Textured bottoms, molded-in graduations. Clear covers in flat, notched, solid with handle, and hinged style. White seal covers and grip lids keep food fresh. Sold each. NSF.

---

**DID YOU KNOW?**

Bacteria grows most rapidly in the danger zone (40 to 140°F) and can double in number in as few as 20 minutes. Food stored in a refrigerator set at <40°F will be less vulnerable to microbial spoilage.

**SAFETY TIPS**

- Make sure to use the First In, First Out (FIFO) method of stock rotation to label product and keep storage clean and organized.
- When in doubt, throw out. The bottom line for all safe food handling and storage practices is that when product safety is in doubt, err on the side of caution and throw food away.
FOOD STORAGE BOXES

Boxes stack securely, fit standard racks and are dishwasher safe. Easy to clean and resists stains, acids and odors. Available in clear, tough polycarbonate for instant food recognition or in affordable white polyethylene. NSF Approved.

ANTIMICROBIAL FRUIT & VEGETABLE TREATMENT
Water alone does not kill harmful pathogens. Monogram® Clean Force® Antimicrobial Fruit & Vegetable Treatment is EPA-registered and FDA-cleared to reduce harmful pathogens on the surface of fresh-cut produce and in wash water. In addition, the unique formulation reduces spoilage organisms, removes waxy residues and helps bolster the appearance of your produce. Available from your local US Foods® division.

8419474  2/64 oz.

COLDMASTER® CHILLER
by Carlisle®
No ice, no electricity! Easy to use, perfect for keeping cans of whipped cream cold at a condiment station, coffee shop, catered events or concession stand. Simply freeze pan overnight and the pan will maintain temperatures at or below 40°F for up to 8 hours.

7813240

SAF-T-WRAP® STATIONS
by San Jamar®
Combines safe dispensing of film with an integrated dating label dispenser; side caddies store other tools. Holds all sizes of rolls. Capacity: Date label rolls: from ⅜”-3” (1.9-7.6 cm) wide; 3⅜” (8.25 cm) dia. Film rolls: from 12”-18” (30.48-45.7 cm). NSF.

White poly block, white poly bristles.

5130208  6”
TOUCH-FREE HAND HYGIENE SYSTEM

Wash hands without touching germy pumps or bars of soap. This closed dispensing system detects waiting hands and releases measured amounts of moisturized, gently scented foam, liquid soap or sanitizer. The energy-saving design reduces batter changes, and the cartridge for each variety of cleanser fits easily into the dispensers. Soap and sanitizer refills are 4/750 ml. Available from your local US Foods® division.

Blue - Cooked Foods
Green - Fruits & Vegetables
White - Dairy
Purple - Allergen

DID YOU KNOW?
Employee hygiene is a common cause of foodborne illnesses, and can be prevented by something as simple as washing hands throughly and frequently.

SAFETY TIPS
• Implement a color coding system to prevent cross-contamination
• Keep refrigerated product in the cooler until it is needed
• Inadequate washing of fruits and vegetables is a cause of foodborne illness
A calibrated thermometer verifies foods reach the correct temperature for safety.
SANI-SAFE® TURNERS
Flexibility for any task, a complete line of commercial turners and tools with the balance of stain-free, high-carbon steel blades and the slip resistance of “Grip-Tex” handles. Handles and blades are fused, eliminating any bacteria traps. Dishwasher safe.

SILICONE BASTING BRUSHES
by Carlisle®
Unique bristle design carries and spreads liquid better than ordinary silicone basting brushes. Withstands temperatures up to 500°F. Convenient molded-in hanging hook grabs pan edges to keep brush from sliding in. Stain- and odor-resistant; Dishwasher Safe.

FOUR EVENT TIMER
by Lifetime Brands
Four timers with individual beeps. LED lights indicate when time is up. 99 hour, 59 minute, 59 second timing, 12/24 hour clock. Fold out stand and magnet. Memory recalls previous timer event. Count up/count down. Includes button cell battery.

ONE-PIECE COLOR CODED KOOL TOUCH TONGS
by Vollrath®
Handles are heat-resistant up to 180°F (82°C). 12”. NSF approved.

SANI-SAFE® TURNERS
Flexibility for any task, a complete line of commercial turners and tools with the balance of stain-free, high-carbon steel blades and the slip resistance of “Grip-Tex” handles. Handles and blades are fused, eliminating any bacteria traps. Dishwasher safe.

DEEP FRY THERMOMETER
by Lifetime Brands
Dial Thermometer. Easy-to-read 2” dial. Range 50° to 550°F and 50° to 285°C. Adjustable temperature indicator. Stainless steel 12” stem with adjustable pan clip.
ANIT-FATIGUE /ANTI-SLIP MAT  by Cactus Mat®
Light duty anti-fatigue/anti-slip mats reduce employee leg and back fatigue while providing a secure footing. 3’ x 5’. 1/2” thick.
8344236  Red, Light Duty
5344213  Red, Medium Duty, Beveled Edge
7344237  Black, Light Duty

ANTIBACTERIAL THERMOMETER  by Lifetime Brands
Reduce the risk of cross-contamination with antibacterial Safe-T-Guard™ case. Unique case design inhibits bacterial growth and doubles as a calibration wrench. Dial models feature a 5” stem and a 0° to 220°F range.
4313938  1” Dial Pocket Test

TYPE K THERMOCOUPLE THERMOMETER WITH PROBE  by Lifetime Brands
Temperature range -58° to 662°F. Accuracy: +/- 1% of reading. Resolution 0.1°F/0.1°C. Hold feature. Recalibratable. Oversized 1.1” LCD readout. 3.9” K-type thermocouple probe included. 2 AAA batteries included.
2659762

DUAL TEMPERATURE THERMCOPLE & INFRARED  by Lifetime Brands
Waterproof thermometer, -67° to 572°F. Includes HACCP temperature zone safety indicator lights, an antimicrobial case, and a step down probe. Carrying case and two AAA batteries included.
1595453

PROPER INTERNAL TEMPERATURES
USDA temperature chart: https://www.fsis.usda.gov/safetempchart

DID YOU KNOW?
A foodborne illness outbreak could cost a restaurant millions.

SAFETY TIPS
• Do not interrupt cooking times by partially cooking food
• Ensure that product is cooked to the correct internal temperature as measured by a properly calibrated thermometer
Foods held properly ensure food safety and best quality. Foods must be held at the right temperature and covered appropriately, using equipment and tools for their designated purpose.
DID YOU KNOW?

“FAT-TOM” is what bacteria usually requires for growth – Food/Acidity/Temperature/Time/Oxygen/Moisture

SAFETY TIPS

- Focus on time and temperature control, but don’t forget about protecting the food from contamination
- Hold hot food at 140°F or higher; hold cold at 40°F or lower
- Pack food densely. The more product that is held together, the better the temperature retention
- Cover food and install sneeze guards to protect food from contaminants. Covers also help maintain a food’s internal temperature

H-PANS™ by Cambro®

H-Pans™ deliver hot performance. Built to withstand temperatures from -40° to 375°F. Perfect for microwave oven or steam table applications. Camwear® seal covers fit H-Pans™ as well. Sold each. NSF approved. Black.

INSULATED END LOADERS

Rugged, stain-resistant polyethylene exterior and extra thick foam insulation provides maximum temperature retention for transporting up to five, full-size, 2 1/2" deep food pans with covers. Coved interior corners and smooth inside walls for easy cleanup. NSF approved.
4151361 Black
COLOR CODED POCKET THERMOMETERS

Color coded dial and sleeves for use in food safety and HACCP Programs. 1" color coded dial with shatterproof lens. Color coded pocket sleeve with patented built-in calibration wrench. Temperature range: 0° to 220°F (-10° to 100°C).

- 7379528 Purple (Allergen)
- 7724530 Yellow (Poultry)
- 5724600 Red (Raw Meat)
- 3715238 Brown (Cooked Meat)
- 5510164 Blue (Fish)

DOMED BAR CENTER

Attractive domed cover for increased capacity and seals upon closing keeping garnishes fresh while keeping out contaminants. Includes one 2 quart insert, four 1 pint chillable inserts and two snap-on caddies. Dishwasher-, refrigerator- and freezer-safe. When open this center measures 24"W x 8"D x 8"H. NSF.

- 7479132 Domed Bar Center
- 9479106 1 Pint Chillable Insert, 1 Ea.
- 8479123 2 Quart Chillable Insert, 1 Ea.

MINI DOME®

Compact, chillable and modular for maximum flexibility. Modular design connects to standard Dome® or Mini Dome®. 1 quart is chillable with ice or 4358503 refreezable packs to keep product fresh with less waste. Deep tray and domed cover allow increased capacity for rush hours. Also great for beverage stations. NSF.

- 4963153 1 qt., 1 Connector, 2 End Caps, Chillable
- 5592340 2 qt., 1 Connector, 2 End Caps
- 4358503 Replacement Ice Packs, 6 Pack

60 MINUTE LONG RING TIMER

Heavy-duty stainless steel construction. Soft touch rubber turn knob. Rubberized base for no slip.

0443531

WATERPROOF DIGITAL THERMOMETER

Antimicrobial case and sleeve. -40° to 450°F (-40°C to 230°C) +/- 1°F in HACCP temperature ranges. On/Off switch with auto shut-off. Dishwasher safe.

0442996
**COLDMASTER® CROCKS** by Carlisle

2 quart. Freeze overnight. Keeps contents at 40°F or lower for up to eight hours. Optional lids and pumps to enhance your condiment service.

- 1164672 White Crock
- 7339781 Clear Solid Lid
- 1104694 Clear Slotted Lid
- 9339789 Clear Pump Lid
- 1339795 Condiment Pump
- 7199433 3 Hole Organizer

**COLDMASTER® STANDARD FOOD PANS** by Carlisle

Freeze overnight, fill with prechilled foods and they’ll hold food temperatures at, or below, 41°F for eight hours. Fits standard food pan templates. All pans are 6" D.

**COLDMASTER COOLCHECK™ FOOD PANS** by Carlisle®

Color changing pans allow you to quickly see when temperatures are no longer safe, eliminating the guessing game behind food safety. When color is blue, food is at a safe temperature, and when white it is above the food-safe temperature. With one overnight charge in your freezer, food can safely be held below 41°F for 6-8 hours. Reduces waste by “telling” workers when food temperature is safe. FDA Approved. Dishwasher safe and NSF listed.

- 57”W x 42”H x 36”D, 5 Pan Cap 6800572
- 40”W x 71”H x 39”D, 20 Pan Cap 12226990

Warranty: 5-Year Limited Warranty on self-contained compressor effective from date of shipment. (Excludes labor). “Ships from WI.”

LOUD RING TIMER
*by Lifetime Brands*
Four channel digital timer with loud 100 decibel ring. Four 10-hour channels, each with a distinctive ring and visual alerts. Anti-microbial and water-resistant housing with large LCD display. Includes 4 AA batteries.
8525904

WATERPROOF PEN THERMOMETER
1.5mm FDA recommended step down probe. On/off switch and recalibrateable. Min/max registry and hold features. -40° to 450°F (-40°C to 230°C). Dishwasher Safe. NSF.
8029302

FREEZER/REFRIGERATOR TUBE CLIP THERMOMETER
-20° to 80°F. Suction cup. 2/Cs. NSF approved.
1596055

DID YOU KNOW?
Improper cooling of food is one of the more frequent food safety violations. Food should be cooled rapidly and refrigerated at/below 40°F within two hours of being cooked.

SAFETY TIPS
- Never place large quantities of hot food in a cooler to cool. Coolers are designed to keep cold food cold, not to cool hot food quickly.
- Rapid cooling helps preserve the quality and shelf life of your food products, and prevent a special type of bacteria called a “sporeformer” from growing.
- Cool foods from 135 to 41°F in 6 hours with the initial two hours having a temperature change from 135 to 70°F. Passing between the temperatures of 125F to 70°F needs to be done rapidly in order to reduce the risk of pathogen growth.
Ensure previously cooked foods are rapidly and thoroughly reheated through the danger zone to a proper holding/serving temperature.
AMBER HIGH HEAT FOOD PANS
by Carlisle®
Pans resist acids, oils, and can withstand temperatures of -40°F to 400°F. Capacity indicators in liters and quarts are marked on the sides. Reinforced corners provide extra strength. Textured bottom hide scratches. Dishwasher safe.

WATERPROOF THERMOCOUPLE
by Lifetime Brands
Easy-to-read dual LCD display, state of the art advanced microprocessor, 2 second response time. For use in high-humidity environments. Wide temperature range: -40° to 450°F or -40° to 260°C. Accurate from +/- 1°F from 0° to 270°F. Rugged, impact-resistant construction, -6’ drop test.
4688883

SOUP KETTLE COOKER/WARMER
Great for rethermalizing, cooking and holding soups and light sauce type products in buffets, serving stations, prep areas, etc. Will retherm refrigerated product from 35° to 160°F in approximately 50 minutes. 10 1/2 quart capacity. Features adjustable temperature control, black powder-coated body, removable stainless steel inset, stainless steel hinged lid assembly, metal base and generic product cards. 14 1/4"H x 13 1/2" Dia. 800W. 120V. Includes power cord with NEMA 5-15 plug.
3839644

SAFETY TIPS

- Never use hot holding equipment to reheat food unless it is built to do so. Most hot holding equipment does not pass food through the temperature danger zone quickly enough. Reheat food correctly, then move it to the holding unit.
- When checking the temperature of product, make sure the temperature holds for at least 15 seconds.
- Reheating food safely involves quickly bringing it up to an internal temperature of 165°F.
- When checking temperatures on whole cuts of meat or large birds, always check the thickest part of the product.
- Check temperature in several parts of the food item to verify even heating; this is especially critical when using microwave ovens.
Contamination is the biggest threat to food that is ready to be served. Clean and sanitized utensils, along with a trained staff, will help minimize cross-contamination.
GOBAG™ PIZZA DELIVERY BAGS
by Cambro
Cambro® GoBags’ high-density insulation keeps temperature in the safe zone during both holding and transport to the customer, whether it’s picked up curbside or delivered to their door. Thick, sturdy 600-denier polyester fabric makes for breathable material. High-density insulation keeps food hot. Heavy-duty, sewn-in straps and ticket pouch. Black.

7570663  Holds 2 to 3 16-18” Pizzas
7763392  Holds 4 to 5 16-18” Pizzas

GOBAG™ FOLDING CATERING BAGS
by Cambro
Cambro® GoBags™ help protect the signature items your customers crave. Your recipes, your quality, and your brand are delivered to your customer — safe and sound. High-density insulation keeps temperature in the safe zone during both holding and transport. Thick, sturdy fabric makes for breathable material. High-density insulation keeps food hot. DID YOU KNOW?
Ice is the forgotten food, and is commonly mishandled
Do not touch the food-contact areas of dishes or glassware. Hold dishes by the bottom or edge. Hold glasses by the middle, bottom, or stem

SAFETY TIPS
• Clean and sanitize all serving utensils at least every four hours
• Use ice scoops to get ice. Never scoop ice with bare hands or a glass. A glass may chip or break
• Products on display must be protected from customers using sneeze guards or be inside closed storage displays
• Employees who clear tables need to wash their hands before running food to guests
• Discard food that is not heated or cooled to temperatures outside of the danger zone (40-140°F) after 2 hours
SAF-T-SCOOP™ & GUARDIAN™ SYSTEMS
by San Jamar
These ice delivery systems prevent ice contamination by eliminating hand contact and provides a sanitary holder for the scoop. Made of durable, dishwasher safe polycarbonate. NSF. Complete systems include Saf-T-Scoop™, Guardian Holder and set of mounting accessories.

Bacteria can be spread throughout the kitchen and get onto hands, cutting boards, utensils, countertops and food. Ensure hands, surfaces, and equipment are properly cleaned and sanitized.
CLEAN

READY-TO-USE CLEANERS

Monogram®/Clean Force® ready-to-use cleaners are convenient and easy to use. As foodborne illness affects 1 in 4 Americans each year, disinfecting and sanitizing hard surfaces is critical to controlling the influenza virus which can survive on surfaces like stainless steel or plastic for 24-48 hours. Proper cleaning and sanitization of the entire foodservice operation is important for maintaining a clean and safe operation, but it is also critical to ensure guests are satisfied and want to return. Available from your local US Foods® division.

**DETERGENT & SANITIZER BUCKETS**
To run a clean operation, make a clear distinction between detergent and sanitizer containers. Our new Monogram® Color-Coded Sanitizer and Detergent Buckets are instantly recognizable, helping your staff use the right chemicals for the right jobs. Each one has interior measurement markings, bilingual instructions and a bail handle for easy carrying. Available in two sizes, they’re an essential tool for keeping your sanitation record spotless.

**KLEEN-PAILS® by San Jamar®**
Reduce cross-contamination risks by keeping your cleaning solutions and food storage containers separate. Can be customized to your use with write-in panel. NSF.

Yellow 7633241  7958549  6 Qt.

**KLEEN-PAILS CADDY™ by San Jamar**
This dedicated, portable system comes complete with an extra-durable pail, integrated spray bottle holder and specially labeled spray bottle. Design also includes a pour spout, comfort-grip stainless steel handle, engraved fill-marks and instructions for use in English and Spanish.

**KLEEN PLUG™ by San Jamar**
Eliminates the time and waste of wrapping beer taps when not in use, as required by health codes. Innovative stepped design fits into a variety of beer tap openings. Sold 5/Pk.

**SLICER CLEANING TOOL by Carlisle®**
Helps keep hands and fingers away from slicer blade. Easy clean-up of slicers without disassembling slicer. Slicer tool has scraper on one end for scraping hardened foods. Single-use scrub pads wrap around the slicer cleaning tool for thorough cleaning. Tool and scrub pads are sold separately.

**GHS STATION - TRAINING MATERIALS by EcoLab®**
Ecolab’s GHS Training Aids facilitate staff training on the new safety data sheets (SDS) and hazardous chemical labels. Includes: 3-hole punched Safety Data Sheets (SDS) Manual - English; DVD Training Aid - English and Spanish; OSHA-required employee training log. Ships from IL.

**Detergent Bucket**

SAFETY TIPS

- Always clean and sanitize your thermometer before every temperature reading
- Enforce a “clean as you go” policy
- Always remember:
  Clean — Wash hands and surfaces often.
  Separate — Separate raw meat from other foods.
  Cook — Cook to the right temperature.
  Chill — Refrigerate food promptly

M.I.S.T.™ FOGGER
by Front of the House, Inc

Easily disinfect large areas and surfaces quickly and cost-effectively. No dilution needed, just fill the Fogger directly from the drum using the drum faucet. ULV (Ultra Low Volume) Foggers quickly disinfect entire areas, unlike electrostatic sprayers, which are directional and surface specific. ULV Foggers are comparatively inexpensive and reduce product usage by dispensing disinfectant droplets as small as 10 microns, making our Fogger the most cost-effective delivery system on the market.

Specifications:
- Tank Capacity 1.32 gal (5L)
- Coiled Hose 16” (41cm)
- Power Cord 15’6” (475cm)
- Power 800W
- AC Adapter Rated Voltage 100-240V
- Effective Range up to 26’ (8M)
- Adjustable Particle Size 10-150μm
- Atomization Volume 470 ml/min
- Net Weight 13 lbs (6kg)
- Adjustable Shoulder Strap 16.5” (42cm)

M.I.S.T DISINFECTING SOLUTION
by Front of the House, Inc

Our ready-to-use formula is designed to be gentle to users but tough on germs, non-irritating to skin, non-corrosive to treated articles, NSF-certified (no rinsing required) for food contact surfaces, and listed in the lowest toxicity category pesticide with the EPA. Our M.I.S.T.™ Disinfecting Solution gives you peace of mind that you are using an effective product that does not come with alarming safety warnings & precautions.

One undiluted 5 gal drum disinfects 25,000 sq ft. Dilution of 5:1 will disinfect 150,000 sq ft. and maintains the same kill rate.

Shipped with a faucet, allowing easy dispensing and storage.

Both food allergies and foodborne contamination can lead to serious and, in some cases, life-threatening illness. Taking safety precautions by incorporating allergen management into your operations is a key element of your food safety practices.
ALLERGEN FOLDING THERMOMETER
Keep your trusty thermometer close at hand with this foldable innovation. It’s small and compact, fitting perfectly in a coat or an apron pocket. It’s also magnetic and includes a convenient lanyard. With quick precision, a large digital display and a purple hue, it’s easy to read and identify as an allergen-safe utensil. For hot or cold items, it’s sure to become your favorite food-safety tool. -40° to 450°F.

ALLERGEN BAMBOO PICK
Tablecraft®
Bamboo pick to assist in the critical identification of allergen prepared dishes.

ALLERGEN-FREE STORAGE CONTAINERS by Cambro®
Designate allergen-free ingredients using Camsquare food storage containers. These containers include easy-to-identify purple graduations and allergen-free imprint on the opposite side. Purple seal covers feature an inner and outer seal to help keep ingredients safe from cross-contamination, even during transport.

ALLERGEN-FREE MEASURING CUPS by Cambro
Keeping separate allergen-free, color coded measuring cups in your kitchen can reduce the risk of cross-contact and accidental exposure to allergens during the preparation process. Externally marked purple graduations and allergen-free logo are imprinted in allergen purple for easy identification.

ECONOMY ALLERGEN DIGITAL THERMOMETER
by Lifetime Brands
Color-coded to reduce the risk of cross-contamination. Purple color for use in allergy programs and kits. NSF Listed. Easy-to-read extra large LCD. -40° to 302°F (-40°C to 150°C).

WATERPROOF ALLERGEN DIGITAL THERMOMETER
by Lifetime Brands
Color-coded to reduce the risk of cross-contamination. Purple color for use in allergy programs and kits. NSF Listed. Includes Safe-T-Guard antimicrobial additive in the case and sleeve. 1.5mm FDA step-down probe. Waterproof and dishwasher safe. -40° to 450°F (-40°C to 230°C). Field recalibrateable.

ALLERGEN-FREE MEASURING CUPS
by Cambro
Keeping separate allergen-free, color coded measuring cups in your kitchen can reduce the risk of cross-contact and accidental exposure to allergens during the preparation process. Externally marked purple graduations and allergen-free logo are imprinted in allergen purple for easy identification.

US. FOODS FOOD SAFETY 42
MOBILE ALLERGEN WORKSTATION

by InterMetro®

Use as a designated cart to prepare and serve food for allergen-sensitive customers when used with appropriate cutting boards and other tools. 20” x 30” top allows for plenty of space, cutting board, knives and other tools. Three shelves with an adjustable middle shelf for increased flexibility. NSF Listed.

4180841

ALLERGEN SAF-T-ZONE™

by San Jamar®

Create an allergen safe zone with color-coded cutting board and tools to protect your customers from food allergens. Contains 12” x 18” x 1/2” Saf-T-Grip® cutting board, 10” chef’s knife with purple handle, 12” stainless steel tongs with purple rubberized dipped handle and 13” stainless steel turner with purple rubberized dipped handle. Thermometer sold separately.

1672583

DID YOU KNOW?

The FDA defines the following 8 items as major food allergens: peanuts, tree nuts, soybeans, fish, milk, crustacean shellfish, eggs, and wheat

SAFETY TIPS

- Separate food before and after preparing menu options to create allergy-free foods, as well as to avoid cross-contamination during storage, preparation and cooking
- Cooking does not eliminate the chance of a person having a reaction. Even a trace amount from a ladle or spoon that was used to pour peanut sauce, then simply wiped off and used for a different sauce, could cause an allergic reaction

Dining out can be an enormous challenge for people with food allergies. Cross-contact is a major concern, as even a slight amount of an allergen could be dangerous.

There have been few resources for the foodservice industry in this area. The FDA Food Code requires only that the person in charge has general knowledge of the eight major allergens and symptoms of a reaction. It is essential to put these practices in place:

Avoid Cross-Contact

Allergen-free ingredients must not come into contact with ingredients containing allergens. If food-contact surfaces, equipment and utensils are not sanitized properly, allergen proteins may remain on them. This could be disastrous to people with food allergies.

Some causes of cross-contact are:

- Improper food labeling
- Inadequate ventilation
- Shared equipment (including utensils, aprons, self-serve stations and cooking oils/fryers)
- Poor sanitation of preparation areas

Small kitchens require extra care in this area. If training, resources and space are limited, allergen management demands careful planning. Commit to preparing allergen-free food at specific times, on pre-set days, with specifically designated equipment.

Ensure Safe Supplies, Equipment and Storage

- Label equipment that is to be used solely for allergen-free ingredients. This includes, but is not limited to, shelving, storage containers, reach-in refrigerators, mixing bowls, cutting boards, utensils, measuring cups and thermometers
- Require kitchen staff to use clean aprons, uniforms and gloves when handling allergen-free foods
- Require that staff change into clean chef coats, aprons and hats before preparing allergen-free foods
- Use separate workspaces and tools to prepare foods containing allergens and allergen-free foods
- If you absolutely cannot avoid using common workspaces and/or tools, thoroughly clean and sanitize them with commercial cleaning products and commercial dishwashing systems. A simple wipe-down or rinse won’t get the job done
- Store allergen- and gluten-free ingredients in clearly labeled, tightly sealed containers in an area reserved solely for allergen-free items

Manage Your Ingredients

- Ensure that your food vendors declare food allergens on package labels, so you know exactly what you’re getting
- Always read the label on the products used to prepare an allergen-free food in the event the manufacturer has made a change
- Prohibit your kitchen staff from running to the local grocery store to purchase to cover shorts, outs or small quantities
- Take the time to get this right. More mistakes happen when time is short

Consumers require safe dining choices away from home. Chefs who provide them keep their guests safe, healthy and loyal. US Foods® is your partner in meeting this challenge and making the transition as safe and seamless as possible.
FOODBORNE ILLNESS IS COMMON, COSTLY AND PREVENTABLE

An outbreak of foodborne illness occurs when a group of people consume the same contaminated food and two or more of them contract the same illness.

- The CDC estimates that each year, one in six Americans (48,000,000 people) get sick, 128,000 are hospitalized and 3,000 die from foodborne illness.

- Survivors of food poisoning can experience long-term health consequences.

- The following actions are most commonly responsible for foodborne illness: purchasing food from unsafe sources, failing to cook food adequately, holding food at incorrect temperatures, using contaminated equipment and maintaining poor personal hygiene.

- Using a food thermometer enables you to confirm, rather than guess, when your food has reached a safe temperature.

- Foodborne diseases are largely preventable, though there is no one-step prevention measure. Instead, contamination must be prevented and limited at each step from the farm to the table.

- It is estimated that foodborne illnesses in the U.S. cost a total of $15.6 million annually.

- Salmonella, a bacteria that commonly causes foodborne illnesses, results in more hospitalizations and deaths than any other bacteria found in food and incurs $365 million in direct medical costs annually.*

** U.S. Dept. of Agriculture, 2018
**FOOD SAFETY 9 STEPS CHECKLIST**

### RECEIVE CHECKLIST
- Check and record the temperature of food as it arrives. Keep thermometers handy for use throughout your operation.
- Refuse, quarantine or return any product that fails your temperature check.
- Transport refrigerated and frozen foods to the proper storage facility immediately after receiving.
- Check and record all expiration dates and package integrity.
- Place incoming shipments on dunnage racks to keep it off the dock floor.
- The packaging of food and non-food items should be intact and clean. It should protect food and food-contact surfaces from contamination.

### STORE CHECKLIST
- Store food 6" from the wall and 6" up from the floor. Slotted shelves should be used for proper air circulation.
- All items should be covered, labeled and dated.
- Make sure thermometers are properly placed and monitored regularly. Keep refrigerated areas at 40°F or below and freezers between 0°F and -10°F.
- Store bulk foods out of potentially contaminated shipping cartons.
- Store food in air-tight containers. Use food pans (with lids), ingredient bins and food storage boxes to keep your kitchen organized and safe from infestations & bacteria.
- Keep a storage temperature log with daily entries.
- If packaging is compromised and may potentially leak, place in an intact container.

### PREPARE CHECKLIST
- To ensure effective and thorough hand and nail cleaning, use a quality nailbrush. Nailbrush systems are available to keep the brush handy, encourage use and keep the brush clean.
- Place glove holders by hand-washing sink to promote hand washing prior to placing gloves on hands.
- Properly clean and sanitize all prep areas prior to beginning prep.
- Inspect each food item for freshness and quality.
- Ensure that all frozen foods have been thawed properly through cooking, microwave or under running water.
- Sanitize food contact surfaces a minimum of every 4 hours.
- Keep refrigerated product in the cooler/refrigerator until it is needed.
- Provide tasting spoons to allow employees to verify product is produced to meet specification requirements, but also to ensure tasting practices do not contaminate product.

### COOK CHECKLIST
- Thermometers should be used to ensure food maintains the proper temperatures.
- Check the temperature in the thickest part of the food. Take at least two readings in different locations.
- Verify the calibration of your thermometers at least once per week.

### HOLD CHECKLIST
- Use garnish centers that allow lids to be closed to prevent cross-contamination and keep foods fresh; also chillable to prevent temperature abuse.
- When holding hot food, always pre-heat your transporter—whether it’s a beverage server or a food carrier or holding cabinet.
- Foods being held for service should have temperatures checked and recorded regularly.
- Fill food containers to correct level to prevent overfilling and to allow sufficient temperature exchange.
### Hold Checklist

- 2-Hour Rule - Any food kept at the danger zone for too long must be thrown out. No amount of cooking can reverse the amount of damage caused by bacteria.
- Products on a steam table lose moisture rapidly. Keep pans covered when not in use, stir frequently, and add liquid as needed.

### Reheat Checklist

- Food must be reheated to an internal temperature of 165°F within two hours.
- Always stir product thoroughly before checking temperatures.
- Unless your steam table comes to a rapid boil, reheat your products on the stove or in the oven so they go through the danger zone rapidly.

### Cool Checklist

- Always pre-cool hot products before refrigeration. Use an ice bath or other method so products cool rapidly.
- Make sure that product is cooled to less than 41°F within 6 hours using the two-stage cooling process.
- If the food hasn’t reached 70°F within two hours, it must be reheated and then cooled again.
- Establish a cooling log to allow employees to document proper cooling.

### Serve Checklist

- Avoid contaminating ice by using scoop systems that stop hand contact with ice. Use dedicated ice totes for safe ice transport and storage.
- Flatware and utensils should be properly stored and dispensed to minimize bare-hand contact.
- Use utensils and tools to minimize bare-hand contact with ready-to-eat foods.
- Food that is delivered or catered must be discarded after two hours if it cannot be held outside of the temperature danger zone.

### Clean Checklist

- Use separate and dedicated cleaning and sanitizing pails to clean stations, tables and counters. Tables should be wiped down with surface disinfecting wipes between turns. Separate towels should be used for tabletop and chair.
- Check rinse temperature to make sure it’s at 180°F in high temp dish machine.
- Utilize test strips to verify that sanitizer is used at the correct concentration.
- Organize a master cleaning schedule & self inspection.
- Be sure to use a waterproof thermometer that can be placed in a protective case and run through the dish machine to validate that the maximum temperature is achieved.
- Remember to clean all carts between uses.

### Allergen Checklist

- Use purple-colored items for quick identification by employees.
- Create separate storage areas for allergen and gluten-free ingredients.
- Your employees should be able to tell customers about menu items that contain potential allergens. At minimum have one person available per shift to answer customer’s questions about menu items.
- When customers say they have a food allergy, you should take it seriously.
- When describing dishes, include sauces, marinades, garnishes and how they are prepared (For example, peanut butter is sometimes used as a thickener in sauces or marinades. This information is critical to a customer with a peanut allergy.)
- Identify any secret ingredients. While you may not want to share the recipe with the public, staff must be able to tell a customer who asks.
- Wash your hands and change gloves before prepping food.
We're here to help protect your brand. To place an order, contact your US Foods® sales representative or visit us online.
