

Club Chef – *Listeria* -Class 1 Recall

At a Glance: Club Chef, a Covington, KY establishment, has issued a Class 1 recall on Fresh Cut Leafy Greens. The issue was identified during environmental monitoring at Club Chef's processing facility in Kentucky. *Listeria* spp. was identified in a specific piece of equipment that removes produce byproduct away from the processing line. While there were no positives associated with the product, the manufacturer elected to conduct a voluntary recall of 2 production dates of a variety of product. Per the supplier, there have been no reports of illness have been associated with these products at this time.

The Issue: *Listeria monocytogenes* is an organism that can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Although healthy individuals may suffer only short-term symptoms such as high fever, severe headache, stiffness, nausea, abdominal pain and diarrhea, listeria infections can cause miscarriages and stillbirths among pregnant women.

Am I Impacted? US Foods' number one priority is to notify any customer impacted by a recall. US Foods has already begun to contact affected customers. If you purchased a recalled product from us, you will be contacted shortly, or have already been contacted. If you purchased products elsewhere, use the information above to check with your supplier.

Why Do Recalls Expand? Manufacturers expand recalls as they verify their own supply chains. In addition, federal and local governments often do additional product testing that leads to an expansion. US Foods will provide updated Fast Facts as new information becomes available. US Foods will only contact customers IF they purchased recalled products from us.

What You Can Do:

- Avoid eating or serving any recalled products
- Do not use any of these products as ingredients in recipes, even if cooked
- Follow instructions to discard recalled products in a manner that prevents others from eating them.
- Wash and sanitize display cases and refrigerators where potentially contaminated products were stored
- Operators who have processed any potentially contaminated products need to be concerned about cross-contamination
- Wash and sanitize cutting boards, surfaces, and utensils used to prepare, serve, or store potentially contaminated products
- Wash hands with warm water and soap following the cleaning and sanitation process
- Persons who think they may have become ill with a food-borne illness should consult their health care providers
- For food safety questions call FDA at 1-888-SAFEFOOD (Mon-Fri from 10- 4 PM EST) or go to <http://www.fda.gov/default.htm>
