# SERVE GOOD<sup>®</sup>, NOW AND TOMORROW

You make countless decisions every day, and we know you want to feel good about how those choices affect both your operation and the world around you. It was with that thought in mind that we created Serve Good<sup>®</sup> – our award-winning program featuring products that are responsibly sourced or contribute to waste reduction.

When we introduced our first Serve Good lineup of 21 products in 2016, at the forefront of the industry's sustainability movement, our insights and instincts told us these offerings would resonate with operators and diners. The response was overwhelming, which is why, two years later, we're again devoting an entire Scoop<sup>™</sup> launch – 24 items – to broadening our Serve Good assortment, now up to more than 350 products.

In this Scoop issue, as we seek to help you satisfy both the cravings and conscience of contemporary diners, we'll highlight our organic and animal care categories. We're expanding those offerings with a variety of items to bolster your menu options – including Non-GMO Project Verified products, raised without antibiotics proteins and Rainforest Alliance and Fair Trade Certified<sup>™</sup> sustainable agriculture products.

Sustainability is more than just a trend, and now is your opportunity to get ahead of the cultural curve – and boost your bottom line in the process. Because our innovative sustainable products can help create labor and cost savings while meeting immediate and long-term diner demands, Serve Good is uniquely equipped to help you compete now and in the future.

As your partner in food, we're committed to helping you serve good – and to helping you make it.

# WHY SERVE GOOD MAKES SENSE

## WHAT'S AT STAKE:

### **56% of consumers**

have stopped visiting a restaurant because of food transparency issues like unclear sourcing and ingredients

– Chr. Hansen and Technomic

## YOUR BOTTOM LINE:

### **74% of millennials**

are willing to pay more for sustainable products and services

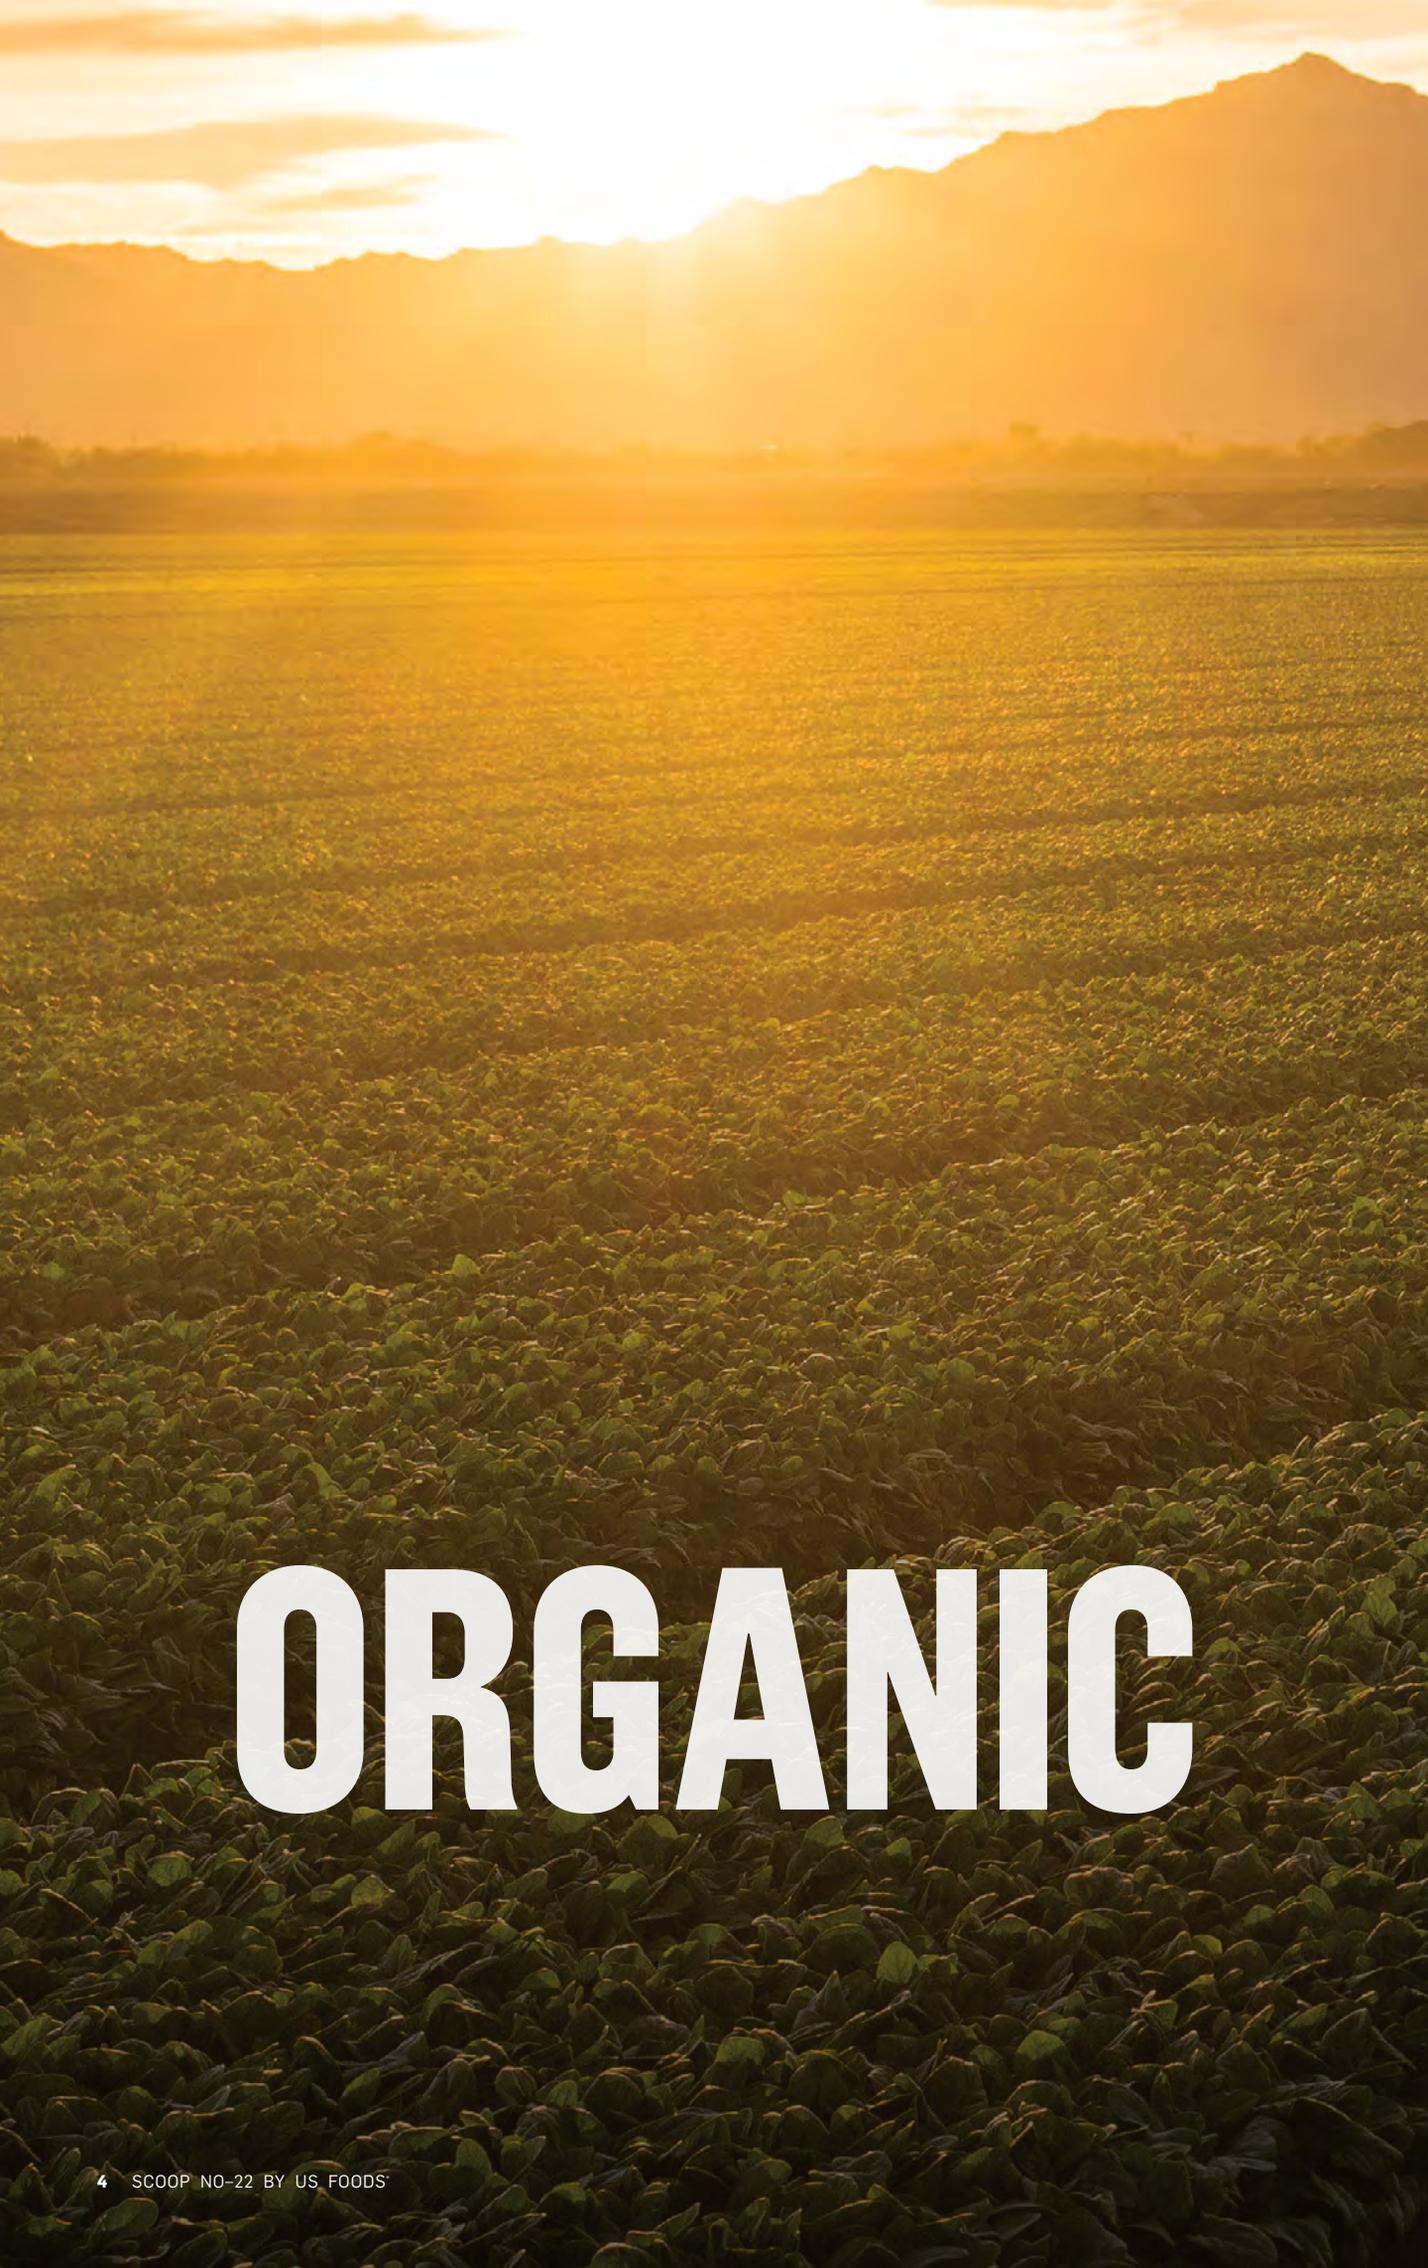

– CONE Communications

## DON'T GET LEFT BEHIND:

### **77% of foodservice businesses**

have changed or added products based on consumer sustainability concerns

– Green Hasson Janks

**ORGANIC**

**As concerns about how our foods are grown and the future of our food systems continue to rise, so does the demand for organic products. To help meet your diners' needs and ensure their trust, we're expanding our organic program while also securing third-party certification.**
